

US COAST GUARD HEADQUARTERS WASHINGTON, DC, USA

PROJECT TYPE: FEDERAL OFFICE BUILDING
PROFESSIONAL SERVICES: SUPPORT SERVICES
ROLE: DESIGN REVIEW, PROJECT IMPLEMENTATION
(WHILE AT GSA)
CORE CONSULTANT TEAM: PERKINS +WILL
CLIENT: US COAST GUARD, GSA
SIZE: 176 ACRES
STATUS: BUILT

PROJECT CHARGE: The US Coast Guard is a dynamic organization, therefore it was imperative that the design of its new headquarters be flexible and adaptable. With a site that is embedded within a National Historic Landmark, the design steps down along the western bluff of the 176 acre campus and creates a series of landscaped terraces that weave between the stepped building, with each terrace expressing a different characteristic of the regional ecosystem to create restorative habitats.
